

The tables below show some of the measures that have already been implemented at the Four Seasons Country Club which have led us to receive the certification from Turismo de Portugal.

We have installed shower heads of water efficient shower systems in all villas.
Introduced water efficient wash basin taps in all villas, shared sanitary facilities and restaurant kitchens.
Introduced water efficient toilets in all sanitary facilities.
Reconfigured the Club's ornamental lake which now uses a closed loop water system reducing water wastage to zero.
Installed efficient flow meters in all common sanitary facilities and in the changing rooms.
Use of high-water efficiency dishwashers and washing machines in accommodation units.
Reduced the number of bidets and bathtubs in accommodation units.
Update rigorous procedures to regularly record and monitor water consumption data.

The following measures are scheduled to be implemented next:

Reduce the daily amount of water needed to refill the pool without compromising water quality.
Reduce replenishment requirements with mains water supply.
Implementation of training, capacity building or awareness-raising activities for staff members.
Prioritisation of the use of "environmentally friendly" detergents.
